## **PERSONAL ACTIVITIES AND PROJECTS**

### **CLIMA-SITES**

Clima-Sites is an interactive web tool that combines real-time weather information with smart tourist recommendations. Designed for travellers, curious or locals, it allows you to discover what to do in a city according to the current weather. (Currently it only shows the weather because the Foursquare API key needs to be renewed: <https://clima-sites.vercel.app/> )

### **TFG: CAPILEARN**

Capilearn is a student platform developed for the IES Gran Capitán secondary school where students can upload video content to help their classmates study.

### **FRIKEMA**

Frikema is a web app where you can consult the latest cinema releases, as well as see information about films from other years and you can consult the most important cinemas in each city of Andalusia. ( <https://frikema-psi.vercel.app/> )

### **AI EVENTS**

Example of a web design for a music event developed with pure web technologies (HTML5, CSS3, and vanilla JavaScript) in 2 hours. A responsive and modern design, ideal for those needing a professional visual makeover for their concert or event website. ( <https://aieventos.danielbalseira.es/> )
